

Eluru 6.5.5 (build 18087) Release Notes

Feature

- [TW-14808](#) - Make 'maven.project.version' and other maven-specific variables available for referring to from all build configuration fields (not only build number format)

Usability Problem

- [TW-18516](#) - Exceptions in the server log if Maven plugin failed to read pom.xml

Bug

- [TW-7938](#) - BackgroundDirectoryCleaner should clean symbolic links
- [TW-11268](#) - TeamCity should not follow symbolic links when deleting files on agent (checkout directories and .old) - Linux
- [TW-13580](#) - TeamCity clearcase adapter tries to load elements from non existent branch in the vcs root
- [TW-15267](#) - NPE after deleting build configuration while a build is running
- [TW-15329](#) - Apply new layout at Install Build Agent pop-up
- [TW-15382](#) - TeamCity email notifications do not properly escape markup chars < > (possibly & ; etc)
- [TW-16436](#) - Agent service cannot be restarted under limited account
- [TW-17167](#) - Build might have "... is not fully resolved, using as is." warning with values with percentage signs that are reported from previous builds (e.g. NLSPATH case)
- [TW-17200](#) - Upgrade agent Java message should have a link to the process in documentation
- [TW-17333](#) - Failed to start build - using git
- [TW-17692](#) - Improve server error 500 reporting in the build log on artifacts publishing
- [TW-18011](#) - Improve message grammar on failed test message
- [TW-18039](#) - Changes not detected after rebase
- [TW-18090](#) - NPE in TeamCity plugin
- [TW-18126](#) - Incorrect warning message when specifying VCS checkout directory via template using configuration parameters
- [TW-18261](#) - java.net.SocketException: Too many open files (and many "cleartool -status" processes)
- [TW-18271](#) - Nuget plugin fails to initialise on the agent
- [TW-18276](#) - Git "Checking for changes" hangs forever - redux
- [TW-18322](#) - Eclipse plugin fails to initialize when Eclipse is run with java 1.5
- [TW-18359](#) - Eclipse plugin remains infinitely on Updating TeamCityStatus
- [TW-18363](#) - Duplicating message in the build log on execution timeout
- [TW-18372](#) - Downloaded build log corrupts unicode symbols
- [TW-18409](#) - MissingFormatArgumentException with agent-side ClearCase checkout
- [TW-18458](#) - A configuration parameter value on a template becomes sticky after the template is moved from a project that declared this parameter project-wide
- [TW-18539](#) - Personal changes from personal branches are lost after server restart
- [TW-18547](#) - Unable to use an empty parameter in the maven home field
- [TW-18586](#) - UnsupportedOperationException: Not supported for personal configurations
- [TW-18632](#) - main-config.xml can be overwritten with default if server failed to load its configuration on startup
- [TW-18677](#) - Agent upgrade may hung if too long path was used

Exception

- [TW-17248](#) - Maven2 project data reader fails when the pom has <scope>system</scope>
- [TW-18325](#) - exception accessing user from SessionUser
- [TW-18530](#) - NoSuchElementException in SearchService
- [TW-18685](#) - Idea plugin throws NPE when closing a project under Idea 11

Performance Problem

- [TW-18426](#) - Listing changelog is incredibly slow in 6.5.4
- [TW-18447](#) - Build owner calculation can be slow
