

# IntelliJ IDEA 13.1 135.689 Release Notes

|   |  |
|---|--|
| No subsystem                                    |  |
| <a href="#">IDEA-95127</a> (Feature)            | Lambda expression does not appear in hirachy   |
| <a href="#">IDEA-121912</a> (Feature)           | copyright: need a way to add missing copyright   |
| <a href="#">IDEA-122091</a> (Usability Problem) | Scratch editor > Save as: provide default directory  |
| <a href="#">WEB-11346</a> (Bug)                 | Bower version detection always fails   |
| <a href="#">IDEA-123444</a> (Bug)               | Item "more..." on Search Everywhere does not work  |
| <a href="#">IDEA-123573</a> (Bug)               | Every keystroke takes a few seconds editing a *.properties file                                      |
| <a href="#">WEB-11701</a> (Bug)                 | JSLint Assignment Option Showing as Error  |
| <a href="#">WEB-11268</a> (Bug)                 | Live Templates in auto-completion interfere with Emmet/Zen expand                                    |
| <a href="#">IDEA-123115</a> (Bug)               | Infer Nullity doesn't mark start of action in Local History  |
| <a href="#">IDEA-123290</a> (Bug)               | Do not see javadoc for javafx classes  |
| Android   |  |
| <a href="#">IDEA-123065</a> (Usability Problem) | If no targets are added to Android SDK 'Next' button in Android project wizard silently doesn't work |
| <a href="#">IDEA-122420</a> (Bug)               | Android Gradle: extra step with project name and location appeared in New Project Wizard             |
| <a href="#">IDEA-123151</a> (Bug)               | Android Gradle project creation confusing  |
| <a href="#">IDEA-122533</a> (Bug)               | Android Gradle-based project doesn't work in IntelliJ but works in Android Studio                    |
| <a href="#">IDEA-123162</a> (Bug)               | NPE in android gradle parser   |
| <a href="#">IDEA-123182</a> (Bug)               | Android manifest merging warning internally treated as error   |
| <a href="#">IDEA-123063</a> (Exception)         | Cannot create new project after cancelling Android project wizard                                    |
| Build tools                                     |  |
| <a href="#">WEB-11707</a> (Bug)                 | Grunt: tasks targets should be shown in Search Everywhere  |
| <a href="#">WEB-11795</a> (Bug)                 | Grunt: verbose and force options are disabled while indexing   |
| Code Analysis.<br>Dependencies                  |  |
| <a href="#">IDEA-123577</a> (Bug)               | Analyze dependencies finds too many dependencies on generic code                                     |
| Console   |  |
| <a href="#">IDEA-122164</a> (Cosmetics)         | Possibility to change default prompt style in LanguageConsoleImpl                                    |
| Dart  |  |
| <a href="#">WEB-11685</a> (Bug)                 | [Dart] Navigate should go to the source file rather than the packages folder (Path packages)         |
| Database  |  |
| <a href="#">IDEA-123751</a> (Bug)               | Database: delete table: wrong reference in constraint error message                                  |

|   |  |
|---|--|
| Debugger                                |  |
| <a href="#">WEB-7303 (Feature)</a>      | Add support for debugging with node-webkit   |
| <a href="#">WEB-11810 (Bug)</a>         | Step over doesn't work when debugging files outside the project content root                         |
| <a href="#">WEB-2100 (Bug)</a>          | Node.js debug: value is truncated, but IDE does not suggest to see full value                        |
| <a href="#">WEB-11392 (Bug)</a>         | Node.js debugging: Copy Value doesn't copy the entire string   |
| <a href="#">WEB-6069 (Bug)</a>          | CoffeeScript Debugger doesn't show value of the variables  |
| <a href="#">WEB-11399 (Bug)</a>         | Live Console: variables defined in the console are not autocompleted (global context)                |
| <a href="#">WEB-11133 (Bug)</a>         | JS Debugger: Variables view is not properly updated after setting value                              |
| <a href="#">IDEA-123653 (Exception)</a> | NCDFFE Could not initialize class com.intellij.javascript.debugger.nashorn.NashornScope              |
| <a href="#">IDEA-123652 (Exception)</a> | EIE at com.intellij.javascript.debugger.nashorn.NashornCallFrame.<init>                              |
| Diff_Merge                              |  |
| <a href="#">IDEA-123286 (Bug)</a>       | Incorrect diff for range revert  |
| Editor. Editing Text                    |  |
| <a href="#">IDEA-101698 (Bug)</a>       | Huge performance hit when adding new property at the end of the large .properties file (~20k lines). |
| <a href="#">IDEA-122405 (Bug)</a>       | Indent selection is disabled in IDEA 13.1  |
| Find, Replace, Find Usages              |  |
| <a href="#">IDEA-90824 (Feature)</a>    | JDK 1.8: Find Usages of a functional interface could find lambda usages                              |
| Flash_Flex                              |  |
| <a href="#">IDEA-123744 (Bug)</a>       | Target Player not specified when creating new Flash project  |
| Gradle                                  |  |
| <a href="#">IDEA-121417 (Bug)</a>       | Gradle war artifact should have a .war extension in name   |
| Groovy                                  |  |
| <a href="#">IDEA-122707 (Bug)</a>       | IDE not parsing BaseScript   |
| <a href="#">IDEA-122729 (Bug)</a>       | Rename refactoring fails on method with spaces (Groovy)  |
| IDE Configuration                       |  |
| <a href="#">IDEA-103016 (Bug)</a>       | Tooltip/label for Toggle Fullscreen Button in Main Toolbar is inverted compared to 'real' status     |
| Java. Code Completion                   |  |
| <a href="#">IDEA-123355 (Bug)</a>       | Postfix template expansions .null/.nonnull after 'else' fail to provide a valid Java output          |
| Java. Error Highlighting                |  |
| <a href="#">IDEA-123731 (Bug)</a>       | valid java 8 code is red in a complex flatMap  |

|                                   |   |
|-----------------------------------|---|
| IDEA-123869 (Bug)                 | valid java 8 code using generics is shown red   |
| IDEA-120498 (Bug)                 | Sub-interface extending two matching methods marked as an error   |
| IDEA-123265 (Bug)                 | Don't highlight parameters as 'unused' if the containing method is used as a method reference                       |
| IDEA-123848 (Bug)                 | Wrong compilation error reported when generics and lambda expressions are combined                                  |
| IDEA-123366 (Bug)                 | passing method reference to Stream::flatMap breaks type inference   |
| IDEA-123518 (Bug)                 | Java Editor shows (wrong) error message when resolving diamond expression   |
| IDEA-123839 (Bug)                 | Compilation error regarding incompatible default methods reported by javac, but not by IntelliJ IDEA                |
| Java. Intention Actions           |   |
| IDEA-112552 (Usability Problem)   | "Replace with lambda" should use expression lambda when possible  |
| IDEA-100036 (Bug)                 | Error when using intention "implement method" on inner class  |
| IDEA-123838 (Bug)                 | Iteration over 'keySet()' may be replaced with 'entrySet()' iteration quick fix produces wrong code                 |
| Java. Refactoring                 |   |
| IDEA-104286 (Bug)                 | Change Signature Refactoring to functional interface should affect lambda expressions                               |
| IDEA-123604 (Bug)                 | Encapsulate fields broken   |
| IDEA-123758 (Bug)                 | Inlining interfaces with constants result in non constant fields  |
| IDEA-123510 (Bug)                 | Invert boolean doesn't work properly for member variables   |
| Java.Inspections                  |   |
| IDEA-123346 (Usability Problem)   | "Typo" inspection available but non-functional if "I18n for Java" plugin is disabled                                |
| IDEA-123818 (Bug)                 | Inspection "JUnit TestCase with non-trivial constructors" should not report error when used in a Parameterized test |
| IDEA-118774 (Bug)                 | Warning about lack of subclasses when using lambdas   |
| JavaFX                            |   |
| IDEA-101939 (Feature)             | JavaFX Application classes should be launchable even without main(String[] args) in Java 8                          |
| JavaScript                        |   |
| IDEA-123467 (Performance Problem) | 100% CPU when working with PHP and/or Node.js dependencies  |
| WEB-11859 (Bug)                   | Custom reference providers for JSON language are broken   |
| Run   Debug configuration         |   |
| IDEA-102508 (Bug)                 | error status of run configuration is not updated after fix  |
| SASS                              |   |
| WEB-11783 (Bug)                   | Compass' image-url helper highlighted by inspector  |

|                                   |   |
|-----------------------------------|---|
| WEB-11632 (Bug)                   | Incorrect SCSS syntax highlighting for placeholder selector with pseudo-class                                     |
| Spring                            |   |
| IDEA-122277 (Performance Problem) | Spring: Hang after detection of unconfigured configuration  |
| Unit Testing. JUnit               |   |
| IDEA-107251 (Feature)             | Create New Test should use a test specific file template  |
| IDEA-121214 (Bug)                 | "Rerun failed tests" does not include parameterized ones  |
| Unit Testing. TestNG              |   |
| IDEA-88524 (Bug)                  | TestNG: Run/debug "use classpath of module" should be forced to "<no module>" when "In whole project" is selected |
| IDEA-123403 (Bug)                 | TestNG integration ignoring test classes without default constructor when using @Guice                            |
| User Interface                    |   |
| IDEA-123360 (Usability Problem)   | Sheet dialogs should have minimum size  |
| IDEA-123230 (Cosmetics)           | html code visible in updated plugin disabled warning  |
| IDEA-120989 (Cosmetics)           | Shared scope icon is confusing  |
| IDEA-123409 (Bug)                 | Sheet dialogs: Order of buttons and their sizes are incorrect   |
| IDEA-123017 (Bug)                 | Mac sheet-dialogs do not correctly handle line breaks   |
| IDEA-123402 (Bug)                 | Sheet dialogs are too transparent, making it hard to read the content   |
| IDEA-116029 (Bug)                 | in-place introduce variable name suggestions popup disappears before I can select anything                        |
| IDEA-121539 (Bug)                 | New Mac Messages: Yes/No messages have buttons in wrong order   |
| IDEA-101642 (Bug)                 | Floating windows disappear/change positions on dual monitor   |
| IDEA-123519 (Bug)                 | Sheet dialog: default button and focused buttons are incorrectly set  |
| IDEA-122866 (Bug)                 | 'Terminate the process after disconnect' checkbox is switch off by default  |
| IDEA-122869 (Bug)                 | Change signature: unreadable message  |
| IDEA-122851 (Bug)                 | Mac Messages on Java 6: sometimes message doesn't get focus   |
| IDEA-122852 (Bug)                 | Mac Messages: underscore (broken mnemonic) on some buttons  |
| Version Control. Git              |   |
| IDEA-122626 (Bug)                 | Can not generate API Token when configuring Github server   |
| Version Control. Mercurial        |   |
| IDEA-123647 (Bug)                 | Mercurial merge fail  |
